

The AXIOM Aesthetic

Weekly inspiration for the creative mind.

2022

This year is bringing some new travel destinations to the map, while our world has been dramatically changed over the past years there are some new, highly anticipated hotel openings this year. Time to plan that dream vacation. These hotels don't have any theme, destination or style in common but they are all topping the charts of cool. The locations range from views of Madison Square park, a working cattle ranch, to private villas on the Aegan Sea, to an eco-luxury lodge in South Africa. Each of the hotels playing special attention to the artwork adorning the space, Lifehouse in the Berkshires will have wire artwork meant to evoke the inside of a typewriter, while Palazzo Roma in Rome will have original frescos restored, the Fifth Avenue Hotel in New York will be featuring Blue Chip artwork while others are paying homage to local artisans and antiques.
