Weekly inspiration for the creative mind.

Baseball is an evolution of ball and bat games played in England in the mid-18th century. Immigrants brought the game to North America where the modern version was developed. In the mid-1850s, a baseball craze hit the New York area. Sixteen area clubs joined in 1858, and the National Association of Base Ball Players was formed with a national governing body and uniform rules. In 1871 the first professional league was formed, The National League, followed five years later by the American League. In 1903 the teams came together in what they called the World Series, this was also the beginning of Major League Baseball. After 1905 this game became an annual event that is still considered a major sporting event today.
