

The AXIOM Aesthetic

Weekly inspiration for the creative mind.

Cotton candy is one of the most popular sweet treats at fairs, carnivals and events around the country. This simple treat is made with just two ingredients, air and colored sugar. The tasty treat dates back centuries to Renaissance Italy where chefs would melt and spin sugar manually, pull the melted sugar into strands and then drape it over a broom handle. This was labor-intensive and expensive. Cotton candy as we know it today was created in the 19th century, surprisingly created by a dentist, Dr William Morrison. He teamed up with candy maker, John C. Wharton to invent the machine used today. During this period it was called "Fairy Floss". It is consumed across the globe and goes by several names now including, Candy Floss, Dragon's Beard, Papa's Beard, Sugar Spider & Old Ladies' Hair! A bag of cotton candy has less sugar and calories than a can of soda and is actually one of the healthier options compared to most foods and treats offered at these events! The popular treat is now made into things like cakes, candies, marshmallows, cookies and flavored ice cream.
